### **DETAILED ACTION**

Applicants' arguments, filed March 17, 2010, have been fully considered but are moot in view of the new grounds of rejections below. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

#### ***Status of Claims***

Claims 19, 20, 23 and 42 are pending and under examination.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 19, 20, 23 and 42 are provisionally rejected on the grounds of nonstatutory obviousness-type double patenting as being unpatentable over claims 23, 24 and 26 of copending Application No. 10/588,902. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter, namely the compounds and compositions embraced by claims 19, 20, 23 and 42, is also embraced by claims 23, 24 and 26 of copending application 10/588,902. Note that instant claims 19, 20, 23 and 42 encompass compounds of formula I, wherein  $R_1 = NH_2$ . While said compounds do not anticipate the scope of claims 23, 24 and 26 of copending application 10/588,902 wherein  $R_1$  is  $NHCH_3$ , they are very closely related having  $NH_2$  in the instant claims versus  $NHCH_3$  in the copending application. However, compounds that differ only in having H vs Me on nitrogen are not deemed patentably distinct absent evidence of superior or unexpected properties. See for compounds that differ only as H vs Me on nitrogen, Ex parte Weston 121 USPQ 428; In re Doebl 174 USPQ 156. Thus, one skilled in the art at the time of the invention would have been

motivated to make compounds of formula I, wherein  $R_1 = NH_2$  rather than  $NHCH_3$  since these compound would have been expected to possess the same pharmaceutical utility in view of the close structural similarity outlined above, thus resulting in the instant invention with a reasonable expectation of success.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
